Final declaration from the Executive Board’s report on relations with affiliated companies pursuant to Section 312 of the German Stock Corporation Act (Aktiengesetz – AktG)

In fiscal 2017, Continental AG was a dependent company of INA-Holding Schaeffler GmbH & Co. KG, Herzogenaurach, Germany, as defined under Section 312 AktG. In line with Section 312 (1) AktG, the Executive Board of Continental AG has prepared a report on relations with affiliated companies, which contains the following final declaration:

“We declare that the company received an appropriate consideration for each transaction and measure listed in the report on relations with affiliated companies from January 1 to December 31, 2017, under the circumstances known to us at the time the transactions were made or the measures taken or not taken. To the extent the company suffered any detriment thereby, the company was granted the right to an appropriate compensation before the end of the 2017 fiscal year. The company did not suffer any detriment because of taking or refraining from measures.”

Additional Disclosures and Notes Pursuant to Section 289a and Section 315a HGB

1. Composition of subscribed capital
   As of the end of the reporting period, the subscribed capital of the company amounts to €512,015,316.48 and is divided into 200,005,983 no-par-value shares. These shares are, without exception, common shares; different classes of shares have not been issued and have not been provided for in the Articles of Incorporation. Each share bears voting and dividend rights from the time it is issued. Each share entitles the holder to one vote at a Shareholders’ Meeting (Article 20 (1) of the Articles of Incorporation). There are no shares with privileges.

2. Shareholdings exceeding 10% of voting rights
   For details of the equity interests exceeding 10% of the voting rights (reported level of equity interest), please refer to the notice in accordance with the German Securities Trading Act (Wertpapierhandelsgesetz – WpHG) under Note 37 to the consolidated financial statements.

3. Bearers of shares with privileges
   There are no shares with privileges granting control.

4. Type of voting right control for employee shareholdings
   The company is not aware of any employees with shareholdings not directly exercising control of their voting rights.

5. Provisions for the appointment and dismissal of members of the Executive Board and for the amendment of the Articles of Incorporation
   a) In accordance with the Articles of Incorporation, the Executive Board consists of at least two members; beyond this the number of members of the Executive Board is determined by the Supervisory Board. Members of the Executive Board are appointed and dismissed in accordance with Section 84 of the German Stock Corporation Act (Aktiengesetz – AktG) in conjunction with Section 31 of the German Co-determination Act (Mitbestimmungsgesetz – MitbestG). In line with this, the Supervisory Board is responsible for the appointment and dismissal of members of the Executive Board. It passes decisions with a majority of two-thirds of its members. If this majority is not reached in the event of an appointment, the so-called Mediation Committee must submit a nomination to the Supervisory Board for the appointment within one month of voting. Other nominations can also be submitted to the Supervisory Board in addition to the Mediation Committee’s nomination. A simple majority of the votes is sufficient when voting on these nominations submitted to the Supervisory Board. In the event that voting results in a tie, a new vote takes place in which the Chairman of the Supervisory Board has the casting vote in accordance with Section 31 (4) MitbestG.
   b) Amendments to the Articles of Incorporation are made by the Shareholders’ Meeting. In Article 20 (3) of the Articles of Incorporation, the Shareholders’ Meeting has exercised the option granted in Section 179 (1) Sentence 2 AktG to confer on the Supervisory Board the power to make amendments affecting only the wording of the Articles of Incorporation. In accordance with Article 20 (2) of the Articles of Incorporation, resolutions of the Shareholders’ Meeting to amend the Articles of Incorporation are usually adopted by a simple majority and, insofar as a capital majority is required, by a simple majority of the capital represented unless otherwise stipulated by mandatory law or particular provisions of the Articles of Incorporation. The law prescribes a mandatory majority of three quarters of the share capital represented when resolutions are made, for example, for amendments to the Articles of Incorporation involving substantial capital measures, such as resolutions concerning the creation of authorized or contingent capital.
6. Authorizations of the Executive Board, particularly with regard to its options for issuing or withdrawing shares
   a) The Executive Board can issue new shares only on the basis of resolutions by the Shareholders’ Meeting. As at the end of the reporting period, the Executive Board has not been authorized to issue new shares in connection with a capital increase (authorized capital) or to issue convertible bonds, warrant-linked bonds, or other financial instruments that could entitle the bearers to subscribe to new shares.

   b) The Executive Board may only buy back shares under the conditions codified in Section 71 AktG. The Shareholders’ Meeting has not authorized the Executive Board to acquire treasury shares in line with Section 71 (1) Number 8 AktG.

7. Material agreements of the company subject to a change of control following a takeover bid and their consequences
   The following material agreements are subject to a change of control at Continental AG:
   a) As at the reporting date, the agreement concluded on April 24, 2014, for a syndicated loan originally amounting to €4.5 billion consists only of a revolving tranche of €3.0 billion. This agreement grants each creditor the right to terminate the agreement prematurely and to demand repayment of the loans granted by it if one person or several persons acting in concert acquire control of Continental AG and subsequent negotiations concerning a continuation of the loan do not lead to an agreement. The term “control” is defined as the holding of more than 50% of the voting rights or if Continental AG concludes a domination agreement as defined under Section 291 AktG with Continental AG as the company dominated.

   b) The two bonds issued by Continental AG in 2013 at a nominal amount of €750 million each, the bond issued by another subsidiary of Continental AG, Continental Rubber of America, Corp., Wilmington, Delaware, U.S.A., in November 2015 at a nominal amount totaling €500 million, and the bond of €600 million issued by Continental AG in November 2016 entitle each bondholder to demand that the respective issuer redeem or acquire the bonds held by the bondholder at a price established in the bond conditions in the event of a change of control at Continental AG. The bond conditions define a change of control as the sale of all or substantially all of the company’s assets to third parties that are not affiliated with the company, or as one person or several persons acting in concert, pursuant to Section 2 (5) of the German Takeover Act (Wertpapiererwerbs- und Übernahmegesetz – WpÜG), holding more than 50% of the voting rights in Continental AG by means of acquisition or as a result of a merger or other form of combination with the participation of Continental AG. The holding of voting rights by Schaeffler GmbH (operating as IHO Verwaltungs GmbH followed legal restructuring within the corporation in 2015), its legal successors, or its affiliated companies does not constitute a change of control within the meaning of the bond conditions.

   If a change of control occurs as described in the agreements above and a contractual partner or bondholder exercises its respective rights, it is possible that required follow-up financing may not be approved under the existing conditions, which could therefore lead to higher financing costs.

   c) In 1996, Compagnie Financière Michelin SCM, Granges-Paccot, Switzerland, and Continental AG founded MC Projects BV, Maastricht, Netherlands, with each owning 50%. Michelin contributed the rights to the Uniroyal brand for Europe to the company. MC Projects BV licenses these rights to Continental. According to the agreements, this license can be terminated without notice if a major competitor in the tire business acquires more than 50% of the voting rights of Continental. In this case Michelin also has the right to acquire a majority in MC Projects BV and to have MC Projects BV increase its minority stake in the manufacturing company of Continental Barum s.r.o. in Otrokovice, Czechia, to 51%. In the case of such a change of control and the exercise of these rights, there could be losses in sales of the Tire division and a reduction in the production capacity available to it.

8. Compensation agreements of the company with members of the Executive Board or employees for the event of a takeover bid
   No compensation agreements have been concluded between the company and the members of the Executive Board or employees providing for the event of a takeover bid.

Remuneration of the Executive Board

The total remuneration of the members of the Executive Board comprises a number of remuneration components. Specifically, these components comprise fixed remuneration, variable remuneration elements including components with a long-term incentive effect, additional benefits and retirement benefits. Further details including individual remuneration are specified in the Remuneration Report contained in the Corporate Governance Report starting on page 24. The Remuneration Report is a part of the Management Report.
Corporate Governance Declaration Pursuant to Section 289f *HGB*

The Corporate Governance Declaration pursuant to Section 289f of the German Commercial Code (*Handelsgesetzbuch – HGB*) is available to our shareholders at [www.continental-corporation.com](http://www.continental-corporation.com) in the Company/Corporate Governance section.
Continental’s overall risk situation is analyzed and managed corporation-wide using the risk and opportunity management system.

The management of the Continental Corporation is geared toward creating added value. For us, this means sustainably increasing the value of each individual business unit and the corporation as a whole. We evaluate risks and opportunities responsibly and on an ongoing basis in order to achieve our goal of adding value.

We define risk as the possibility of internal or external events occurring that can have a negative influence on the attainment of our strategic and operational targets. As a global corporation, Continental is exposed to a number of different risks that could impair business and, in extreme cases, endanger the company’s existence. We accept manageable risks if the resulting opportunities lead us to expect to achieve sustainable growth in value. We consider growth in value in terms of the Continental Value Contribution (CVC) system described in the Corporate Management section.

Risk and Opportunity Management and Internal Control System

In order to operate successfully as a company in a complex business sector and to ensure the effectiveness, efficiency and propriety of accounting and compliance with the relevant legal and sub-legislative regulations, Continental has created a governance system that encompasses all relevant business processes. The governance system comprises the internal control system, the risk management system and the compliance management system, which is described in detail in the Corporate Governance Declaration on page 23. The risk management system in turn also includes the early risk identification system in accordance with Section 91 (2) of the German Stock Corporation Act (Aktiengesetz – AktG).

The Executive Board is responsible for the governance system, which includes all subsidiaries. The Supervisory Board and the Audit Committee monitor its effectiveness.

Pursuant to sections 289 (4) and 315 (4) of the German Commercial Code (Handelsgesetzbuch – HGB), the main characteristics of the internal control and risk management system with respect to the accounting process must be described. All parts of the risk management system and internal control system that could have a material effect on the annual and consolidated financial statements must be included in the reporting.

Key elements of the corporation-wide control systems are the clear allocation of responsibilities and controls inherent in the system when preparing the financial statements. The two-person rule and separation of functions are fundamental principles of this organization. In addition, Continental’s management ensures accounting that complies with the requirements of law via guidelines on the preparation of financial statements and on accounting, access authorizations for IT systems and regulations on the involvement of internal and external specialists.

The effectiveness of the financial reporting internal control system (Financial Reporting ICS) is evaluated in major areas by testing the effectiveness of the reporting units on a quarterly basis. If any weaknesses are identified, the corporation’s management initiates the necessary measures.

As part of our opportunity management activities, we assess market and economic analyses and changes in legal requirements (e.g. with regard to fuel consumption and emission standards, safety regulations). In addition, we deal with the corresponding effects on the automotive sector and other relevant markets, our production factors and the composition and further development of our product portfolio.

Governance, risk and compliance (GRC)

In the GRC policy adopted by the Executive Board, Continental defines the general conditions for integrated GRC as a key element of the risk management system, which regulates the identification, assessment, reporting and documentation of risks. In addition, this also further increases corporate-wide risk awareness and establishes the framework for a uniform risk culture. The GRC Committee ensures that this policy is adhered to and implemented.

The GRC system incorporates all components of risk reporting and the examination of the effectiveness of the Financial Reporting ICS. Risks are identified, assessed and reported at the organizational level that is also responsible for managing the identified risks. A multi-stage assessment process is used to involve also the higher-level organizational units. The GRC system thus includes all reporting levels, from the company level to the top corporate level.
