

# ContiTech – Hydrogen Fuel Station Solutions

## Our Market needs

- › Hydrogen is an important option for the sustainable transformation of energy-intensive industries
- › Efficient and safe handling of hydrogen (high-pressure, low temperature, high flexibility, low permeation, antistatic) demanded
- › Market has limited competition today
- › Total market value 2030e<sup>1</sup>: 1.5 bn Euro, entry via “Handling” sub-market 220 mn Euro

## Our Solutions

- › The hydrogen dispensing unit safely dispenses hydrogen fuel at high pressures while retaining its flexibility, even under very low temperatures without any permeation

## Our Business Success

- › On track for market entry 2025
- › Carry-over our competencies in hosing solutions with minor adjustment and most efficient use of our resources
- › Building on our reputation for high quality ContiTech hoses

## Our Value Proposition

- › We understand the value chain and we look for profitable opportunities where we can leverage our existing competence, creating customer centered solutions in the most efficient way

## Our Proof Points

- › Decades of experience as both an original equipment manufacturer and competent development partner in the fluid handling sector for complete solutions
