

# WHAT CONTINENTAL SENSES ARE IN AN AUTONOMOUS TRUCK?

A top-sensor module:  
High-resolution 4D long-range radars and cameras as well as LiDAR

Two side sensor modules:  
Combination of high-resolution 4D long-range radars, wide-angle cameras and LiDAR sensors with medium range

Three short-range sensor modules:  
Combination of surround radars, cameras with different detection ranges and LiDAR

Four layers  
of control units for  
automated driving
