

**CES 2021**

Mobility is the Heartbeat of Life  
**aAGV (autonomous Automated Guided Vehicle)**

# aAGV (autonomous Automated Guided Vehicle) AMS

“Increase efficiency in production is an important contribution to long-term competitiveness.”

Alexander Schmitt – Head of Segment

- › Continental develops a state-of-the-art, autonomous transport vehicle to further increase the efficiency of its own production.
- › This technological solution is an integral part of Continental's Industry 4.0 strategy.
- › The aAGV align themselves to the correct direction and flexibly avoid obstacles.
- › The expertise from highly-reliable automotive-grade environmental sensors such as radar, camera, ultrasonic, and LiDAR, as well as sensor fusion and the environment model, was a key component in the development of the aAGV.
- › Volume production is to begin after the test phase. It is also planned to offer the system outside Continental at a later point in time.
- › Contact: *Benedikt Grudda (AMS HBS Communications)*

**H**eavy duty      **C**E certified      **O**pen interface      **I**ntegrated lift-function  
**U**ltra compact design      **F**ull collaborative interaction with environment      **D**eveloped according Automotive standards  
**U**WB ready
